

24B – Numbering Addendum

Closes the six open numbering questions as decisions. No design changes result; the document-type seed flags and the decision log are updated, and NFR-CMP-030 moves from gating to advisory.

Field	Value
Document	24B – Numbering Addendum to 24 M4 Trading Documents (and to doc 18 part C, doc 32 §8, 19A §7)
Version	v1.0 – decisions recorded
Date	9 September 2026
Decided by	Chamin (programme), 9 September 2026: the working assumptions are adopted as decisions
Effect on the build	None beyond seed values; the kernel numbering service, the till counters and M4's series usage are implemented as already specified

Status of the tax advisor review. NFR-CMP-030 asked for a written tax-advisor review of the numbering design. The programme has decided not to wait for it. The review remains advisable and, if it arrives with a different view, is handled as an ordinary change request against this addendum. Until then these decisions stand and the risk is owned by the programme, recorded in doc 10.

1. Decisions

#	Question	Decision	Where it lands
N-1	Financial-year reset of series counters	No reset. Every series counts monotonically for its lifetime; the display format carries no year segment	<code>numbering_series.fy_reset = false</code> for all series; no reset job; doc 18 §5 DR-1 closed
N-2	Is a GRN outside the fiscal gapless obligation?	Yes. GRN is an internal material document; gaplessness is kept as an operational control (sync gap check), not a fiscal requirement	<code>document_type.fiscal = false</code> for GRN; LOCATION series at shops stands; doc 18 §5 DR-2 closed
N-3	Multiple series per entity (per till position, per location, per document type) instead of one sequence	Accepted. The RFC design is adopted: ENTITY series per document type; LOCATION series for shop-issued stock documents; TILL_POSITION series for receipts	ADR-11 confirmed; no change
N-4	Voided keep their numbers	Yes. A voided or reversed document retains its number; the reversal is a new numbered document linked by REVERSES	Doc 18 C-I2 (density) and <code>document_link</code> rules stand
N-5	Fiscal numbering for discrepancy and claim documents	No. They number from the issuer's ENTITY series for traceability but are not fiscal	<code>document_type.fiscal = false</code> for DISC and CLM
N-6	Retention period for numbered documents	Indefinite, pending a formal retention policy (J-06); partitions are detached to cold storage, never dropped	Doc 14 DR-6 tiering policy proceeds on that basis

2. Fiscal document set (as decided)

Document type	Series scope	Fiscal	Issuer
RCT till receipt (incl. void, same-session refund)	TILL_POSITION	Yes	Shop (till)
INV tax invoice	ENTITY	Yes	Seller
CN credit note / DN2 debit note	ENTITY	Yes	Seller
PRC payment receipt	ENTITY	Yes	Seller (or MPCs for customer receipts)

Document type	Series scope	Fiscal	Issuer
ORD order	ENTITY (buyer)	No	Buyer
DN delivery note	ENTITY	No	Seller
GRN goods received note	LOCATION (shop) / ENTITY (warehouse)	No	Receiver
DISC discrepancy / CLM claim	ENTITY	No	Issuer
CNT count / WOF write-off / XFR transfer	LOCATION (shop) / ENTITY	No	Holder
ADJ adjustment / RPK repack / OPB opening balance	ENTITY	No	Holder

Fiscal documents are the ones whose gaplessness and immutability the e-invoicing seam and any tax inspection rely on; the same mechanism protects the others, but their gaps are operational findings rather than compliance findings.

3. Changes applied

seed/kernel/document-types.yaml	fiscal: RCT, INV, CN, DN2, PRC = true; all others = false; fy_reset
absent (false everywhere)	
seed/kernel/numbering-format.yaml	display =
{entity_code}-{location_code}-{T{position}}-{type}-{number:07d}	(no year segment)
doc 09 Decisions Log	ADR-11 note: N-1..N-6 confirmed 9 Sep 2026; NFR-CMP-030 reclassified
advisory	
doc 10 Open Items	'Tax advisor numbering review' -> carried as advisory risk, owner:
programme	
doc 18 part C	DR-1, DR-2 closed; document_type table note updated
doc 24 section 3.10	'interim' removed; refers to this addendum
19A section 7 / 21A section 11	assumptions marked as decided

End of addendum.
